Your new Quadient folder-inserter includes on-board "intelligence" as a standard feature. It can read and execute assembly instructions embedded in barcodes printed directly onto your business documents. This technology ensures the right pages go into each customer's envelope. You'll realize enhanced automation and process integrity that can make a measurable impact on your business.

Expense Control

- Eliminate the need to manually sort documents by page count prior to machine processing
- Automatically process complex mail jobs where the number of pages varies by recipient

Risk Mitigation

- Prevent hand assembly mistakes that can damage both your image and relationships with customers
- Meet compliance requirements by sending the correct document set to mail recipients every time

To help you maximize your folder-inserter's capabilities, you'll also receive a trial version of OMS-500 Cloud, Quadient's easy-to-use output management software. This software makes it quick and simple to add security barcodes to your documents.

By combining OMS-500 with your intelligent folder-inserter, variable-page document jobs are 100% automated and envelope contents are always accurate.
