Powerful Color Management Tools

Quadient's optional mColor RIP™ & Workflow software delivers the color consistency and accuracy required by creative and production-oriented users alike for their projects and short run print jobs.

This software incorporates color management tools, production job presets, hot folders and the powerful Harlequin® RIP™ engine into one workflow product.

With its easy-to-use job workflow interface, mColor provides the tools to automate production, manage jobs and deliver professional color quality control to the Quadien MACH Series printers.
Harlequin® RIP™ Technology

We built mColor based on the state-of-the-art Harlequin® RIP™, the expert printer's choice.

Variable Data Management (VDM)

The VDM module makes variable data printing fast and easy. Merge variable PDFs with static PDFs and other graphics. VDM allows full color management functionality.

Advanced Color Management and Spot Matching

The mColor RIP™ provides the tools to edit spot color without being a color expert.

ICC Profiles

Built-in ICC color profiles ensure the best possible output on a wide variety of papers.

Workflow Productivity

Submit, manage and preview jobs anywhere on the network from a Mac® or PC.
